PREFATORY NOTE

This volume of CUMULATIVE BOOK INDEX is a permanent record of books published during 1975. Books published before 1975 or early in 1976 may be included if the information was received within the 1975 calendar year.

CUMULATIVE BOOK INDEX is an author-subject-title international bibliography of books published in the English language. Government documents, most pamphlets, cheap paper-bound books, maps, music scores, editions limited to five hundred (or less) copies, privately published genealogies, local directories, prospectuses, tracts, tests, propaganda, and in general, all material of a local, fugitive, and ephemeral nature are not included.

While works which are wholly in a foreign language are not listed, dictionaries, grammars, phrase-books, readers, editions of foreign classics, and other aids to language learning, are included if they contain some English.

All index entries are in a single alphabetical list. Author entries, which are the most complete, contain full name form (including pseudonyms), complete titles, series, edition, paging, price, date of publication, and publisher. International Standard Book Number and Library of Congress card number are given when available.

Prices quoted are list prices which are, of course, subject to change.

A Directory of Publishers and Distributors appears at the end of the volume.
